

Service Desk Incident Report

Report Prepared By

Name: Denis Zhaferov

Date: 24.09. 2026

Role/Position: Service Desk Analyst

Incident Details

Incident ID: № 54321

Date and Time of Incident: 23.09.2026 / PM 8:30

Reported By: Jenna Marshall

Client Company Name: GreenScape Landscaping

Incident Description

Brief Description of the Incident: When attempting to log in to email, the page refreshes without an error

Impact on Client Operations: Inability to work with clients

Initial Assessment

Initial Hypothesis of the Issue: Browser cache issue

Relevant Information Gathered (include any error messages, descriptions of unusual behavior, etc.): She is the only one with the problem. Manage to log in using incognito mode

Detailed Analysis

Steps Taken to Identify the Problem: log in in incognito mode

Questions Asked: Did a login error occur?

Was the system being update?

Did the client try logging in from a different device or browser?

Was an log in attempt made via the mobile app?

Client Responses: Only i have, it works in the mobile app and in another browser.

Key Findings: (What led to identifying the root cause?): Outdated browser cache and cookies were interfering with the login process

Resolution Steps

Detailed Steps Taken to Resolve the Issue:

I suggested logging in using all available methods.

She replied that everything was working except for her browser.

I suggested clearing the cache.

The client cleared the cache.

The problem was resolved.

Client Actions (if any): clearly followed my instructions and cooperated

Resolution Timeframe: 1 hour

Outcome and Follow-Up

Confirmation of Resolution (How was it confirmed that the issue was resolved?): The client was able to access their email, and the issue did not recur.

Client Satisfaction (Any feedback received from the client post-resolution): The client was satisfied

Follow-Up Actions Recommended to the Client: if the issue recurs, clear the browser cache before contacting supports

Lessons Learned and Recommendations

Insights Gained (What did you learn from this incident?): that a full browser cache can be one of the causes of such login issues

Recommendations for Preventing Similar Incidents (For both the support team and the client):

For the client: regularly clear the browser cache (using Ctrl + Shift + Del) every 2–4 weeks.

Before contacting support, try opening the site in incognito mode.

Keep a phone with the app installed handy so that work can continue if the issue recurs.

Contact support immediately if any instability arises.

Suggestions for Process Improvement:

For the support team:

Create an article titled "Login page refreshes without error" containing ready-made steps, starting with checking via Incognito mode or a different browser.

Create a short guide for clients that they can easily follow on their own.

Documentation and Closure

How was the incident documented in the ticketing system?

Ticket № 54321 has been closed with the status "Resolved"; comments containing the resolution steps have been added.
